

I have experience in working with Sanja for quite a long time now 😊 covering positions in different industries, from telco to FMCG both in Croatia and internationally. And as in many other areas in executive search it is all about relationships and Sanja has a terrific network and a killer eye for talent. With experience in a number of different industries and business environments she brings the perspective and insight needed to make the right hiring match for both the position and the person.

Sanja is highly professional in her approach to recruiting. She never loses sight of the customer and always establishes professional yet comfortable relationships with the recruit and does not believe in quick wins. She proved to me that she believes in building sustainable relationships with her clients and candidates. Sanja is very detail-oriented and someone who does what is necessary to ensure the candidates and clients are handled professionally throughout the search process. Her follow-up skills are impeccable and her feel for the candidate is unparalleled.

It is a great pleasure to work with her. She comes highly recommended.
